*Drip Dispersal & Water Reuse...Solutions For All Sites*

**You're Invited !!!**

## Environmentally Beneficial and Innovative Technologies:

### Perc-Rite Drip Dispersal & Rainwater Capture Systems – A Start to Your Sustainable Future

Come learn about two very innovative products on the market: **The Perc-Rite® Drip Dispersal System** is fully approved in Massachusetts, New Hampshire, Maine, Vermont, & Rhode Island (as well as 32 other states & Canada) and has quickly become a superior & permanent solution for wastewater disposal. In use 30+ years, this tried & true technology is **the only approved drip system which can be used for septic tank effluent or treated effluent for new construction or repairs**. There is no fee to attend these sessions; light refreshments will be served.

The **RainKeeper® rainwater capture system** is an easy, affordable, and great way to harvest and reuse our most precious resource...water. With the global water shortages and municipal bans, capturing rainwater is prudent. This environmentally beneficial option is available for residential or commercial sites.

**(Note: This is a partial listing of seminars...contact Oakson, Inc. for a full list of locations/dates)**
